PROFESSIONAL SUMMARY

Senior Product Designer (UI/UX) with **11.5 years of experience** building user-centered digital products across SaaS, IoT, B2B, healthcare, and live entertainment at scale. Currently at Insight Global, leading UX research and design across 50+ in-house and client products. Previously at Ticketmaster, led enterprise surveys with 4,000+ respondents across multiple countries. Known for translating complex, fragmented workflows into unified, measurable product experiences.

WORK EXPERIENCE (11.5 Years)

Senior UX Designer (UI/UX) · Insight Global Staffing Services India Pvt. Ltd. *(July 2026 – Present)*

- Design for Johnson & Johnson (J&J) through Insight Global, improving data-heavy enterprise platforms used by clients worldwide — including product and order management (tracking delivered vs. pending orders), product and material catalogues, and surgical set planning tools that define in advance which products a surgery will require.
- Modernized 4 enterprise products within the first 4 months, redesigning and building from scratch complex, data-dense interfaces into user-friendly experiences through UX improvements, cleaner information architecture, and modern UI design.
- Own the end-to-end design process: direct stakeholder discussions, proof-of-concept and idea presentations to finalise the design direction, wireframing, high-fidelity design, usability testing, developer handoff, and ongoing build support so the shipped product matches the design intent.
- Design primarily in Figma across all projects; also design Microsoft Power BI dashboards and reports that client teams use to track and analyse operational data.
- Use GenAI tools — Claude, Microsoft Copilot, and ChatGPT — in the design workflow to accelerate ideation, design exploration, and documentation.

Senior Product Designer (UI/UX) · Ticketmaster Entertainment LLC *(Apr 2024 – June 2026)*

- Led end-to-end UX research and redesign of the Event Dashboard — the most-used internal product at Ticketmaster — conducting multi-country surveys with 4,000+ respondents across diverse user roles to identify pain points and synthesise actionable improvements. Delivered a redesign that unified fragmented data and features into a single, accessible dashboard adopted globally.
- Redesigned the Notes & Assets module in Maps Portal (part of the Event Creation to Publish workflow), introducing reply threads, pinned comments, smart attachment management, and enhanced search — eliminating reliance on Slack and email for team communication. Reduced unnecessary clicks for 2,000+ clients and resolved long-standing workflow frustrations for 500+ internal users across India and global teams.
- Sole designer for BLU 3D — a purpose-built internal application designed from scratch to replace Jira/Azure for teams managing 3D venue maps. Unified multiple disconnected tools into a single product; received strong praise from all stakeholders at handover.
- Integrated GenAI tools (Figma Make, Claude) into the design workflow — using AI to accelerate wireframe iteration, generate research synthesis drafts, and prototype interaction variations — reducing design exploration time significantly.
- Ensured all redesigned interfaces adhered to WCAG 2.1 AA accessibility standards, accounting for diverse user needs across global markets and internal teams.
- Contributed to and maintained Ticketmaster's global design system, ensuring visual, component, and interaction consistency across multiple product teams and platforms.
- Collaborated with Product Managers, Engineering, QA, and global stakeholders across fan-facing web products and B2B venue partner tools—driving backlog discussions, requirement alignment, UX strategy, and end-to-end interaction design.

Senior UI/UX Designer · Trantor Software Pvt. Ltd. *(Mar 2022 – Apr 2024)*

- Served as sole designer on the complete digital overhaul of EQUUSCS Holdings — redesigning 8 digital platforms (equuscs.com, serversdirect.com, hub.equuscs.com, channel.equuscs.com, rimage.com, eqh.com, intequus.com, and serversdirect.com/hub) for a U.S.-based enterprise computing provider whose clients include Google and Netflix.
- Delivered measurable results post-launch: 40% improvement in task completion time within the HUB order management workflow, 18% reduction in bounce rate on product pages, 30% increase in product page engagement, and ~25% fewer internal support tickets.
- Produced 20+ PDF brochures, spec sheets, and technical documents; authored developer handoff documentation; and ensured all platforms were fully responsive.
- Led direct client communication and cross-functional alignment across product owners, engineering, marketing, and QA teams.

Senior Associate UI/UX Designer · smartData Enterprises *(Jan 2019 – Mar 2022)*

- Operated within Agile/Scrum workflows — participated in sprint planning, backlog grooming, requirement discussions, design reviews, and iterative delivery cycles across concurrent client projects.

- Led product design for WIOT360 — a 21-service IoT and fleet management SaaS platform operating across UAE — designing all dashboards (school bus, employee transport, fleet, garbage truck, jet ski dispatch, analytics), 3 mobile apps (Parent, Driver, Admin), and the marketing site. Directed the client's offshore design team and worked directly with the stakeholders as primary design lead.
- Achieved 37% reduction in onboarding confusion and 90% task completion rate across key user flows (trip logging, location tracking, report generation) — validated via Hotjar heatmaps, Google Analytics funnel tracking, and remote usability testing.
- Designed getsunday.com marketing platform for a U.S. DTC lawn care brand — conducting real user interviews (recruited via Reddit, Facebook groups, and brand newsletter), developing 3 research-based personas, running A/B tests on CTAs and layouts, and delivering a modular component system. Post-launch results included lower bounce rates, smoother navigation, and increased add-to-cart rates.
- Led UI/UX design and frontend integration for Bitclu.com — a SaaS analytics dashboard for Amazon sellers — designing all modules (dashboard, ROI tracker, inventory alerts, report builder) and converting designs into production-ready AngularJS components. Advocated for export report customization which became a highly used feature post-launch.
- Conducted end-to-end UX ownership across all projects: client discovery workshops, business requirement gathering, wireframing, prototyping, usability testing, stakeholder presentations, functional documentation, and cross-team coordination.
- Built and maintained Figma component libraries to accelerate design consistency and developer handoff across multiple concurrent projects.

UI/UX Designer · Code Brew Labs (*Apr 2018 – Dec 2018)*

- Gathered product requirements and conducted UX research to define user flows, wireframes, and prototypes for web and mobile applications and participated in frontend code reviews, ensuring implementation matched design intent and adhered to HTML/CSS coding standards and cross-browser compatibility benchmarks.
- Designed and delivered high-fidelity UI for multiple client products, leading client communication and presenting design direction to stakeholders.
- Performed UI/UX audits, created and maintained style guides and branding guidelines, and implemented designs via HTML, CSS, Bootstrap, and WordPress.

Web & Graphic Designer · Esferasoft Solutions Pvt. Ltd. *(Jul 2015 – Apr 2018)*

- Designed visual layouts, marketing collateral, and responsive web interfaces for multiple client projects across industries.
- Implemented designs through HTML, CSS, SCSS/SASS, Bootstrap, and jQuery — delivering mobile-friendly, cross-browser-compatible websites and collaborated with internal teams and clients to suggest UX improvements and maintain brand consistency across digital and print assets.

SKILLS

UX Practice: UX Research, Enterprise Surveys, Usability Testing, User Interviews, A/B Testing, Journey Mapping, Service Blueprinting, RICE Prioritization, Wireframing, Prototyping, Information Architecture, Interaction Design, Visual Design, Design Systems, **Accessibility (WCAG 2.1 AA)**

Design Tools: Figma, Adobe XD, Sketch, Miro, Framer, InVision, Balsamiq, Photoshop, Illustrator, Power BI

Frontend: HTML, CSS, SCSS/SASS, Bootstrap, jQuery, AngularJS, Vue.js, including design-to-code handoff, frontend implementation, UI code reviews

AI Tools: Figma Make, Claude, ChatGPT, DeepSeek, Microsoft Copilot

Collaboration: Zeplin, Notion, Loom, Jira, FigJam, Maze, MS Office, Google Docs, Spreadsheets

Process: Agile, Scrum, Sprint Planning, Backlog Grooming, Design in Iterative Cycles

Motion & Visual Design: Generative AI tools, Adobe After Effects, Adobe Premiere Pro, Adobe Acrobat

Industries: Live Entertainment · B2B SaaS · IoT · E-Commerce · On-Demand · Food & Beverage · DTC · Fintech · Healthcare · Marketing & Product Websites · Mobile Apps · Enterprise Computing

SELECTED PROJECTS

Ticketmaster — Event Dashboard & Maps Portal · ticketmaster.com

Technologies: Figma, Figma Make, Claude, and Design System

Redesigned Ticketmaster's core internal Event Dashboard (4,000+ survey respondents) and Maps Portal Notes & Assets module — impacting 500+ internal users and 2,000+ clients globally.

EQUUSCS Holdings — Digital Ecosystem · equuscs.com · serversdirect.com · rimage.com

Technologies: Figma, WordPress, HTML/CSS/Bootstrap/PHP/WooCommerce, Photoshop

Sole designer for 8-platform digital overhaul for a U.S. enterprise computing provider (clients include Google & Netflix). Delivered 40% faster task completion, 18% bounce rate reduction, and 30% engagement increase.

WIOT360 — IoT & Fleet Management SaaS · wiot360.com

Technologies: Adobe XD, Figma, Vue.js, HTML/CSS/Bootstrap

Designed 21 services, 7 dashboards, and 3 mobile apps (Parent, Driver, Admin) for a UAE-based fleet management platform. Achieved 37% reduction in onboarding confusion and 90% task completion rate.

Bitclu — Amazon Seller Analytics SaaS · bitclu.com

Technologies: Adobe XD, AngularJS, HTML/CSS/Bootstrap, InVision

Lead designer and frontend integrator for a SaaS analytics dashboard for Amazon Marketplace sellers. Designed all modules and converted designs to production-ready AngularJS components in close collaboration with the engineering team. Collaborated closely on code reviews for AngularJS components, validating design-to-development accuracy and flagging UI inconsistencies during QA cycles.

Sunday Lawn Care — Marketing Platform · getsunday.com

Technologies: Adobe XD, Balsamiq, InVision, Photoshop, Illustrator

Redesigned marketing platform for a U.S. DTC lawn care brand — primary research via real user interviews, 3 personas, A/B testing — resulting in lower bounce rates and increased add-to-cart rate.

EDUCATION & CERTIFICATIONS

Master of Arts in English · Lovely Professional University, India

Bachelor of Arts (BA) · Lovely Professional University, India

Diploma in Computer Applications (DCA) – Certification · Sky Wings Institute of Computer Education, Faridkot, India
